

MODULE # 2 is a 48 acre, master plan development, conveniently located adjacent to Front Range Parkway and next to the Terminal and FBO services.

Sites for Group II and Group III aircraft hangars are ready to build as roads taxiways and utilities are completed on the first 20-acre phase of the module.

August 9, 2006, the Airport and Amjet celebrated the completion of the first Hangar in Module #2, a box hangar with six units each 62' x 70' with 22' high doors known as the Fiorini Hangar.

The second building is under construction, a 28,000 s.f. hangar with a 116' wide by 28' high door Aircraft as large as a Gulfstream V can be accommodated in the hangar, scheduled for completion February 2007.

Plans are underway for two more hangars to be constructed in Module #2 during 2007.

Personalized, comprehensive service is available to plan, design, construct and equip hangars and buildings to individual requirements by contacting Amjet's Michael B-C at (303) 751-9339 or www.amjet2.com
